

# MACROVISION VIDEO PRODUCT REQUEST FOR REVIEW FORM

## Instructions

Form for requesting approval of new model(s) which use the same **Solution** as a previously-certified model.

**Solution** means the combination of the following elements:

1. Video standard (e.g., 625/PAL, 525/NTSC, etc.)
2. Macrovision-capable video encoder LSI type
3. 525p and/or 625p progressive scan video output capability
4. 525p and/or 625p progressive scan video encoder LSI
5. Portion of the firmware that interprets/passes through/responds to the APS Trigger Bits, CGMS-D data or CPS\_TY data
6. Filter or other circuitry located between the Macrovision capable video encoder LSI and the DVD product video output connector (if any exists in the product)
7. Video outputs
8. Video inputs
9. Whether a VCR player is included
10. Whether a DVD Recorder is included
11. Whether a Hard Disk Drive is included
12. Macrovision-detection circuit

If none of the above elements changes, then the product is the same Solution.

Fill in the Request for Review form, **sign at the bottom**, and email to [DVD-TEST@macrovision.com](mailto:DVD-TEST@macrovision.com) or FAX to 408-567-1804 (or 408-567-1800 in case of problems).

You may list more than one new model name in the “New Model Names/Numbers” field if all models are the same Solution and the same Brand.

If Macrovision finds that the new model(s) is the same Solution as a previously-certified model, we will send you a PDF letter of approval for the new model(s).

If we find that the new model(s) is a different Solution, we will ask you to submit a sample for testing.

Request for Review can only be submitted **after** Macrovision has certified one sample of the Solution.

Please allow two weeks for processing.
